Replacement Types of Prest-O-Lite Storage Batteries

WHEN ordering a Prest-O-Lite Replacement Battery by mail, always give the Replacement Number and Type Number of the battery desired. In ordering by telegraph or cable use replacement number code, in which case shipment will be made with terminals attached as indicated on Replacement Drawing. All telegraph or cable orders must be confirmed with written orders.

If Replacement Number or other information relative to proper terminal assembly is not given, the terminals most commonly used will be included in the shipment, but will not be burned on the battery.

Battery equipment on many cars oftentimes changes during the course of the production of a certain model. It will sometimes happen that a car will be found to be equipped with a different type of battery than is shown in this Replacement List.

It is advisable, therefore, whenever possible, to check the dimensions and arrangement of the replacement type herein specified against those of the battery which is to be replaced.

We are not liable for damage to goods in transit. We require the transportation companies to give us receipts for each shipment in full and in good order, therefore all claims for damage in transit should be filed against the transportation companies, as our responsibility ceases upon delivery to them.
